Replacement Parts & Accessories ET-16 Light Emitting Diode - Parts

Renewal Part	116B6709G1 - Receptacle
Renewal Part	165A7844P - Resistor
Renewal Part	286A5442P - LED Lamp
Renewal Part	286A5442P1835 - ET-16 Incandescent lamp (48V and higher).
Renewal Part	286A5443P - Lens Cap
Renewal Part	286A5442P1819 - ET-16 Incandescent lamp (24VDC)

Note:

For resistor, Please specify voltage

- 24 dc -120 ac
- 48 dc -240 ac
- 125 dc -70 ac
- 250 dc -130 ac

Note:

For lamp, Please specify color and voltage

For lens cap, please specify color

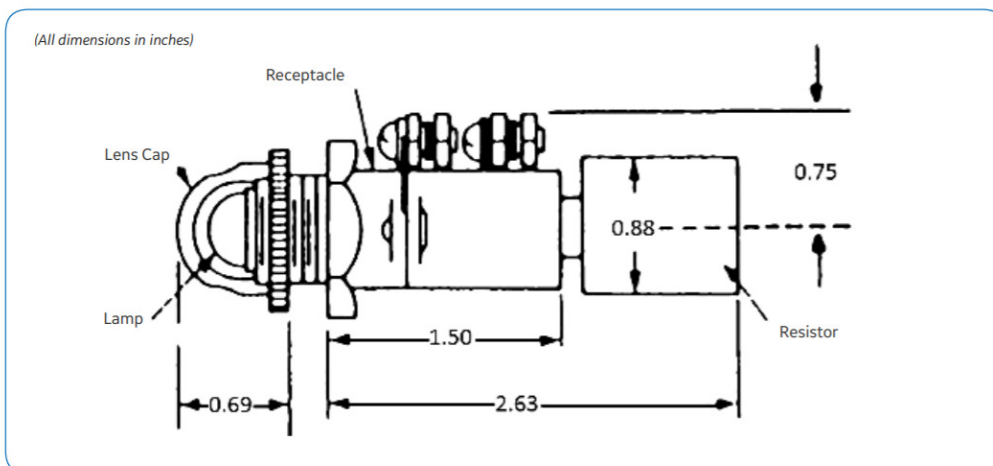

-

The ET-16 Light Emitting Diodes (LED's) are designed for application on control panels up to and including a 1/4 inch thickness. This assembly economizes on space and permits ease of replacement for bulbs and resistors.

Features & Benefits

- 100,000 Hour Life
- Reduced Heat
- Resistance to Shock & Vibration
- Cost Savings
- No Cold Filament Inrush Current

ET-16 LED Dimensions

Note: Hole size (metal up to 0.25 inches thick) = 0.66 inch diameter
