

# Hermetic stainless steel Single Point

## Platform Size up to 800x1200 mm

### Wash Down Applications

SSH is the right choice for the food or pharmaceutical industry where daily wash down is required. It provides best weighing performance in a hermetically sealed stainless steel load cell. Thus it is ideal for stainless steel scales or general weighing applications where the highest grade of IP protection and corrosion resistance is required.

### Off-Center compensation

One load cell can be used to support a weighing platform and, due to the off-center load compensation, the SSH will weigh within tolerance regardless of load application point.

### Highest Robustness

SSH is an extremely robust single point load cell suitable for almost all industrial environments. It allows 50% static overload without compromising the weighing performance.

## SSH Hermetic Single Point Load Cell

The SSH load cell features:

- Off-center load compensation (R76)
- OIML R60 C3 approval (200 - 1000kg)
- up to 800x1200 mm platform size
- IP68 protection class
- Stainless Steel
- 50 - 1000kg capacity range

The SSH is the ideal solution for floor scales and packaging and process weighing where a hermetically sealed stainless steel load cell is required for harsh chemical and washdown environments. Due to the low profile the integration into any system is easy. The broad capacity range and large platform size allows wide application in industrial weighing applications.

## Full Connectivity

METTLER TOLEDO supplies various data communication interfaces that enable our sensors and instruments to communicate with your PLC, MES, or ERP systems.

## METTLER TOLEDO Service

Our extensive service network is among the best in the world and ensures maximum availability and service life of your product.

## Weighing Electronics

METTLER TOLEDO offers a complete family of electronics from simple weighing to application solutions for filling, stock control, batching, formulation, counting, and checkweighing.
