Legacy Fibreglass

Fibreglass Enclosures for Demanding Environments

Designed with superior materials and environmental versatility in mind, Rittal's Legacy Series Fibreglass Enclosures offer the ultimate in protection for your sensitive control and automation solutions in the world's most demanding industrial environments.

Whether your application is a chemical processing plant, a wastewater facility, an offshore oil platform or a solar farm, these hard-working fibreglass enclosures and solutions can provide the superior protection for virtually any environmental concern. Offered in a range of specifications, the Legacy Fibreglass Enclosures can provide anything from rain and watertight features to fire resistant protection.

These CSA, UL/cUL certified NEMA Type 4X fibreglass enclosures will ensure that your electrical and electronic devices are secure and protected. All of our fibreglass enclosures and junction boxes are corrosion and fire-resistant, padlockable, feature 180 degree hinges and can withstand temperatures from -40C/-40F to +130C/+250F.
