SITOP lite

The low-cost basic power supply

Technology overview	
Input	120/230 V AC (85132/170 264 V AC) 20 A: 120 – 230 V AC (85 264 V AC/88 370 V DC)
Output	24 V DC/2.5 A; 5 A; 10 A; 20 A
Output adjustment range	22.8 26.4 V DC
Efficiency	Approx. 85 92%
Status signaling	Green LED »24 V OK«
Temperature range	0 +60 ° C (derating >45 ° C) 20 A: -25 +70 ° C
Certifications	CE (W) W EDEE

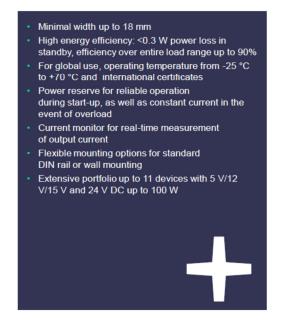

Wide range input AC with manual switchover, 20 A version even features automatic switchover and DC compatibility
Minimal installation width with no lateral clearance requirement to neighboring devices
Green LED for »24 V OK«
Parallel connection option for enhanced performance
Provides all important functions at a favorable price – without compromising on quality or reliability

The cost-effective basic power supply

SITOP lite is the power supply series for basic requirements in the industrial environment, offering all the important functions at a low cost – without compromising quality and reliability. The wide-range input with manual switchover supports connection to a wide range of single-phase supply systems.

The wide-range input with manual switchover supports connection to a wide range of 1-phase supply systems. Thanks to the narrow width, the fanless primary switched-mode regulators require little space on the DIN rail and take up little space on the DIN rail and do not require lateral clearance to neighboring devices.

The high degree of efficiency results in low power consumption and heat loss in the control cabinet. Short-circuit and overload protection as well as UL approval for export ensure problem-free use. To further increase the 24 V availability, the SITOP lite basic power supply units can be combined with DC UPS, redundancy and selectivity modules.

SITOP lite - SITOP PSU100L The cost-effective basic power supply

Feature / Function

Narrow installation width because no lateral clearances are required to neighbor devices

High degree of efficiency: Up to 92%

Cooling through natural convection

Wide-range input for AC with manual switchover, 20-A version even available with automatic switchover and suitable for DC

Adjustable output voltage 22.8...26.4 V DC (20 A: 22.8...28 V DC)

Green LED for output voltage "24 V o.k."

Electronic short-circuit protection with constant current characteristics

Ambient temperature range

2,5 A, 5 A, 10 A: 0 ... + 60 °C

20 A: -25 ...+ 70 °C

Benefit

>

>

>

- Less mounting surface on DIN rail required
- Low energy consumption and low heat > development in the control cabinet
 - Fanless operation without forced ventilation
- Worldwide connection to a variety of singlephase supply networks possible > 20-A version also operation with battery network possible
 - Compensation of voltage drop on long lines
- Detection of ready for operation >
- Reliable overload protection, provides maximal current before switching-off
- Application under various ambient conditions allowed

Functions and benefits

Feature / Function

Narrow width

High efficiency up to 90% over the entire load range

Minimal no-load losses < 0.3 W

Measurement point for current output current

Standard DIN rail and wall mounting

Operating temperature from -25°C to +70°C

Power reserve when starting up as well as constant current in the event of overload

Ex-variant LOGO!Power Ex 24 V/4 A

Benefits

- Smallest construction type in each performance class saves space
- Energy savings in stand-by mode and during operation
- Real-time performance monitoring for commissioning and operation
- Flexible mounting possible
- Savings during start-up, especially in cool environments
- Operational reliability through problem-free connection of loads with high inrush current
- Meets new ATEX standard mandatory from April 2022
