

The industry we service is driven by increased efficiency, reliability and safety. Chess Controls and our partners of quality products know the consequences of process failure are great. That is why our team have an unwavering commitment to standards and processes that ensure innovative and reliable product designs and assemblies.

Partnered with leading manufacturers in the industry, Chess Controls provide sophisticated technology to meet the most demanding needs of your process. We work closely with our clients to understand the objectives and align our deliverables to meet the needs. We stock the more common products which we supply on demand as a stand-alone product. We also provide value add assemblies fully tested and calibrated based on your specific needs.

Our team focuses on quality, maintenance, performance and reliability when determining the best product / assembled solution for your application. Regardless of the requirement, our team applies a well-defined methodology during our assembly and testing process to ensure you receive a quality solution on time.

Clients prefer our “KEEP IT SIMPLE PROCESS”
